

Legend Golf and Safari Resort - Mookgophong, Limpopo

ANALITIKA 2018 PROGRAMME

		Sunday 22	July 2018	
14:00 – 18:00		Exhibition stand build-up		
14:30 -	17:30	Registration and check-in (open area between Monomatapa and Sofala)		
15h00		Game Drives (pre-booking)		
10.00	21.00	Welcome Function		
18:00 –	21:00	Transport departing from Monomatapa Vil	lage	
		Monday 23	July 2018	
8h00	Registration			
8h30	Confe	erence welcome address: Patricia Forbes		
	VENU	E: Queen of Sheba		
8h40	Chair:	Patricia Forbes		
	Plenar	ry 1: Graham Cooks		
	Organi	ic synthesis and chemical analysis by mass sp	pectrometry	
9h40	VENU	E: Queen of Sheba	VENUE: Sofala	
	Sessio	n Chair: Patricia Forbes	Session Chair: Charlotta Turner	
	Keyno		Keynote 2:	
		ative analytical approaches for analysis of	Chemical profiling to identify marker compounds for	
		nt air well as emission- and workplace-	quality control using UPLC-MS and rTLC	
	aerosc		Sandra Combrinck	
		mmermann		
10h10	LA1:		LB1:	
		channel polydimethylsiloxane denuder	Optimization of water extraction with on-line particle	
		es for the determination of gas and	formation of Moringa Oleifera	
	-	ulate phase polycyclic aromatic	Yannick Nuapia	
	-	carbons in underground mines		
10h30	LA2:	ı-Leigh Schoonraad	LB2:	
101130		e treatment methods for accurately	Separation and analysis of phenolic compounds in	
		fying total iodine and mercury in	depolymerized lignin samples by ultra-high-	
		pheric particulate matter samples using	performance supercritical fluid chromatography	
		ively coupled plasma – mass spectrometry	Margareta Sandahl	
	(ICP-N			
	Richard Webster			
10h50				
11h30	LA3:		LB3:	
		opment of a single format membrane	Isolation of standards for quantification of compounds	
		ed solvent extraction-molecularly imprinted	in Moringa oleifera and Mondia whitei using	
	polymer technique for extraction of polycyclic		preparative chromatographic techniques	
	aromatic hydrocarbons in wastewater followed		Ramakwala Chokwe	

	by gas chromatography mass spectrometer				
	determination				
	Somandla Ncube				
11h50	LA4:	LB4:			
	Routine pesticide multi methods redefined –	Phytoremediation potential of Hyptis suaveolens and			
	maximizing benefits of high resolution mass	Euphorbia hirta weed plants			
	spectrometry in food contaminant analysis	Stephen Agwuncha			
	Laszlo Hollosi				
12h10	LA5:	LB5:			
	Flower of Typha latifolia as a low cost adsorbent	Chemical profiling of Marchantiophyta occurring in			
	for removal of selected multi pesticide residues	South Africa			
	in contaminated aqueous samples	Johan Linde			
	Teshome Dadi				
12h30	LUNCH				
13h30	Chair: Liezel van der Merwe				
	Plenary 2: Walter Focke				
	The power of thermal analysis in applied materials research				
14h30	Session Chair: Graham Cooks	Session Chair: Walter Focke			
	LA6:	LB6:			
	Screening of antiretroviral compounds and their	Application of thermogravimetric analysis in the			
	metabolites in aqueous environmental matrices	investigation of mineral transformations during			
	using UHPLC-HRMS, UHPLC-MS/MS and SFC-	thermochemical treatment of mineral wastes			
	MS/MS	Sameera Muhamed			
	Tlou Mosekiemang				
14h50	LA7:	LB7:			
	Non-steroidal anti-inflammatory drugs residues	Environmental rating of pneumatic tyres			
	in river water, sediments and aquatic plant	Motshabi Sibeko			
	species of Mbokodweni River in South Africa				
	Lawrence Madikizela				
15h10	LA8:	LB8:			
	A novel fluorescence sensor for acetaminophen	A thermogravimetric investigation into the synthesis of			
	Hanieh Montaseri	cobalt (III) fluoride			
		Bernard Vilakazi			
15h30	TEA				
16h00	LA9:	LB9:			
	The analysis of endogenous steroids in human	A comparison of different quantification approaches for			
	urine by GC-C-IRMS	trace analysis by high resolution inductively coupled			
	Elandré Marais	plasma mass spectrometry (HR- ICP-MS) – The case of			
		elements in soil			
		Angelique Botha			
16h20	LA10:	LB10:			
	Stability of some of the components of the street	Real Time Process Control Analyses by Hand Held X-Ray			
	drug nyaope in organic solvents	Fluorescence Spectroscopy for PGM Processing			
	Pabalala Mthembi	Chantelle Engelbrecht			
16h40	LA11:	LB11:			
	Removal of sulphonamide drugs from	Gravimetrical preparation and value assignment of a			
	wastewater using nanofiber from Moringa	high accuracy elemental calibration standard solution –			
	Stenopetala protein extract	critical aspects			
	Temesgen Kebede	Maré Linsky			
17h00	LA12:	LB12:			
	Analytical Techniques and Requirements of a	Determination of rare earths and non-rare earths in			
	Doping Control Laboratory	metallurgical samples by inductively coupled plasma			
	Ebeth Grobbelaar	optical emission spectroscopy			
		Dhiroshnee Govender			
17h30	SAAMS AGM (Queen of Sheba)				
18h30	Braai in the White Lion Lapa				

Shoo Registration	Tuesday 24 July 2018					
Sh30 VENUE: Queen of Sheba Chair: Lily Marjanovic Plenary 3: Gary Hieftje Is There No Better Analytical Plasma Source than the ICP?	8h00		3			
Chair: Lily Marjanovic Plenary 3: Gary Hieftje Is There No Better Analytical Plasma Source than the ICP? 9h30 VENUE: Queen of Sheba Session Chair: Ralf Zimmermann Keynote 3: Silicone rubber concentrating samplers – from environmental and aroma applications to the analysis of human skin volatiles by GCxGCMS Egmont Rohwer 10h00 LC1: Analysis of Semi Volatile Organic Compounds (SVOC) with In-situ Derivatization Thermal Desorption Two-dimensional Gas Chromatography and Time of Flight Mass Spectrometry (IDTD-GCxGC-ToF-MS) Juergen Orasche 10h20 LC2: Additive assisted DLLME and UHPLC-ESI-MS for trace analysis of a secondary biogenic emission marker in atmospheric aerosols Hafiz Abdul-Azeem 10h40 TEA 11h10 Session Chair: Wiana Louw LC3: Evaluation of sample preparation methods for GC-MS and GC x GC-HR-TOFMS analysis of South African Chenin blanc volatiles Sithandile Ngxangxa Session Chair: Luke Chimuka LD3: LD3: A simple validated method for the extraction and quantification of tazarotenic acid in human plasma be high performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Biotin labelling based method for membrane protein enrichment Wonder Nxumalo						
Plenary 3: Gary Hieftje Is There No Better Analytical Plasma Source than the ICP? 9h30 VENUE: Queen of Sheba Session Chair: Ralf Zimmermann Keynote 3: Silicone rubber concentrating samplers – from environmental and aroma applications to the analysis of human skin volatiles by GCxGCMS Egmont Rohwer 10h00 LC1: Analysis of Semi Volatile Organic Compounds (SVOC) with In-situ Derivatization Thermal Desorption Two-dimensional Gas Chromatography and Time of Flight Mass Spectrometry (IDTD-GCxGC-ToF-MS) Juergen Orasche 10h20 LC2: Additive assisted DLLME and UHPLC-ESI-MS for trace analysis of a secondary biogenic emission marker in atmospheric aerosols Hafiz Abdul-Azeem 10h40 TEA 11h10 Session Chair: Wiana Louw LC3: Evaluation of sample preparation methods for GC-MS and GC x GC-HR-TOFMS analysis of South African Chenin blanc volatiles Sithandile Ngxangxa Session Chair: Luke Chimuka LD3: A simple validated method for the extraction and quantification of tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Botton Tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Botton Tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Botton Tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Botton Tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Botton Botton Tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Botton Botton Tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner LD4: Botton Botton Tazarotenic acid in human plasma bhigh performance liquid chromatography tandem mas spectrometry Machel Leuschner						
Session Chair: Ralf Zimmermann Keynote 3: Silicone rubber concentrating samplers – from environmental and aroma applications to the analysis of human skin volatiles by GCxGCMS Egmont Rohwer Challenges in developing a South African herbal Pharmacopeia - A national priority Alvaro Viljoen LC1: Analysis of Semi Volatile Organic Compounds (SVOC) with In-situ Derivatization Thermal Desorption Two-dimensional Gas Chromatography and Time of Flight Mass Spectrometry (IDTD-GCxGC-ToF-MS) Juergen Orasche LD2:						
Session Chair: Ralf Zimmermann Keynote 3: Silicone rubber concentrating samplers – from environmental and aroma applications to the analysis of human skin volatiles by GCxGCMS Egmont Rohwer 10h00 LC1: Analysis of Semi Volatile Organic Compounds (SVOC) with In-situ Derivatization Thermal Desorption Two-dimensional Gas Chromatography and Time of Flight Mass Spectrometry (IDTD-GCxGC-ToF-MS) Juergen Orasche 10h20 LC2: Additive assisted DLLME and UHPLC-ESI-MS for trace analysis of a secondary biogenic emission marker in atmospheric aerosols Hafiz Abdul-Azeem 10h40 TEA 11h10 Session Chair: Wiana Louw LC3: Evaluation of sample preparation methods for GC-MS and GC x GC-HR-TOFMS analysis of South African Chenin blanc volatiles Sithandile Ngxangxa Session Chair: Cary Hieftje Keynote 4: Challenges in developing a South African Plantal on the analysis of human spounds in developing a South African Pinotage wines using Hydrogen and Helium as carrier gases Session Chair: Gary Hieftje Keynote 4: Challenges in developing a South African herbal Pharmacopeia - A national priority Alvaro Viljoen LD1: LD1: Identification of lignin oligomers in kraft lignin using high-resolution mass spectrometry Jens Prothmann LD2: UPLC-MS analysis of phenolic compounds in rooibos: (Aspalathus linearis) with a comparison of flavonoid-based compounds in plants from different regions Malcolm Taylor Session Chair: Luke Chimuka LD3: A simple validated method for the extraction and quantification of tazarotenic acid in human plasma bi high performance liquid chromatography tandem ma spectrometry Machel Leuschner LD4: Biotin labelling based method for membrane protein enrichment Wonder Nxumalo						
Keynote 3: Silicone rubber concentrating samplers – from environmental and aroma applications to the analysis of human skin volatiles by GCxGCMS Egmont Rohwer	9h30
